

Weather Reach Signal Service for Rain Bird® ET Manager™

Rain Bird ET Managers automatically manage watering schedules based on real-time weather conditions. The Weather Reach Signal contains hourly weather data, broadcast through commercial wireless paging carriers to ET Managers. Customers save money and landscapes are healthy because they are watered efficiently.

Nation Wide ET & Weather

Accurate, real-time, weather data assures ET Managers control irrigation with the best possible information. The Weather Reach Signal includes five hourly climate measurements; Solar Radiation, Wind, Humidity, Temperature and Rainfall.

Irrisoft maintains weather station networks to sustain water conservation. A subscription is quickly offset by lower water bills, time savings, and healthy landscapes.

Irrisoft, Inc. offers Weather Reach Signal Service in most areas of the US at a cost of \$88.00 per year per Rain Bird ET Manager. Setup your own account on-line to Activate ET Managers by going to www.weatherreach.com/RainBird or call 435-755-0400.

A map of current weather stations can be found at

www.weatherreach.com/RainBird

If service is not shown in your area contact Irrisoft, Inc.

Benefits
